SafeControl Manager
Licence models and capability packages

SafeControl Manager supports a wide range of safe deposit and high-security operations. From smaller installations to complex, multi-site institutions, it manages mechanical lockers, electronic systems and fully automated self-service environments.

Every installation starts with a clearly defined licence model and can be **expanded with capability packages** to match your operational requirements today, while remaining flexible for future growth.

Quick comparison guide

Comparison of licence models

	Automated safe deposit locker systems (SSA)	Electronic locker systems (SDL)	Mechanical locker systems (MSDL)
Mechanical locker administration			✓
Electronic locker support	✓	✓	
Semi-automated locker support	✓	✓	
Customer self-service	✓	✓	
Contract management	✓	✓	✓
Fee accounting			✓
Four-eyes principle	✓	✓	✓
Central configuration and database creation	✓	✓	✓
Up to five simultaneous user accesses	✓	✓	✓

Comparison of add-on capability packages

	Management Plus: Automated (SSA)	Security Plus: Automated (SSA)	Institute Plus: Automated (SSA)	Security Plus: Electronic (SDL)	Extension Package Plus: Electronic (SDL)	Extension Package Plus: Mechanical (MSDL)	Data Centre/ FI (All)
Centralisation			✓		✓		
Fee accounting	✓				✓		
Fee statements/extended fee handling	✓						
Digital signature capture	✓					✓	
Push messages (system status)	✓				✓		
Notification system	✓				✓		
Night safe functionality	✓						
Biometric authentication		✓		✓			
Video recording		✓		✓			
Two-factor authentication (OTP)		✓		✓			
Detect Mode		✓					
Operating time control overview		✓					
Replication server			✓		✓		
Replication client			✓		✓		
Additional replication client					✓		
Self service access with KDU						✓	
Base license for Secure Safe systems						✓	
Host Interface Server (HIS)							✓
Host Interface Client							✓
Host Interface Login							✓
Administration-only interface options							✓

Choosing the right foundation: licence models

Every SafeControl Manager installation begins with the right licence model. Three options are available, enabling you to tailor the software foundation to your operational needs.

Automated safe deposit locker systems

Software licence, P-code: P000032290

For fully automated environments with customer self-service. This licence combines administrative control with customer-facing functionality, supporting modern, high-volume installations.

Suited for

Automated safe deposit environments where customer self-service is a priority.

Included capabilities

- Customer self-service access
- Contract management
- Four-eyes principle
- Central configuration and database creation

Electronic locker systems

Software licence, P-code: P000032287

For electronic or semi-automated locker environments. This licence supports dynamic access control, customer self-service, and contract handling while maintaining clear operational oversight.

Suited for

Businesses using electronic lockers that require flexible access management and stronger operational control.

Included capabilities

- Contract management
- Four-eyes approval workflows
- Central configuration and database creation
- Support for electronic access control systems and semi-automated lockers

Mechanical locker systems

Software licence, P-code: P000032289

For traditional safe deposit environments managed by staff. This licence provides the essential tools required to operate mechanical locker systems securely and efficiently.

Suited for

Single-site environments or locations using mechanical locker systems where staff manage access.

Included capabilities

- Administration of mechanical locker systems
- Contract management and fee accounting
- Four-eyes principle for controlled access
- Central configuration and database creation
- Up to five simultaneous user accesses

Cabin/Airlock sensor licence

Software licence, P-code: P000032292

For automated safe deposit environments requiring dedicated monitoring of cabin or airlock sensors. This licence enables sensor-based supervision, supporting enhanced safety and controlled operation in automated installations.

Suited for

Automated safe deposit locker systems where monitoring of the cabin or airlock is required to support operational safety, compliance, or controlled customer access.

Add functionality with capability packages

As requirements change, SafeControl Manager allows you to add curated capability packages without altering your core system. Each package addresses a specific operational need, making it easy to scale functionality while maintaining control.

All capability packages build on SafeControl Manager's robust security foundation, extending functionality in targeted areas such as administration, integration or advanced authentication.

Management Plus: Automated (SSA)

For smoother operations and improved system visibility. Management Plus is especially valuable for organisations operating multiple systems or managing complex daily operations, where administrative efficiency and clear system visibility are critical. Applicable for automated safe deposit locker systems.

Ideal when

You want to streamline administrative processes, improve operational visibility or support extended service availability. Especially valuable for organisations with multiple systems or complex operations.

Included features

- Fee accounting
- Fee statements and extended fee handling
- Digital signature capture
- Push messages about system status
- Notification system for warnings, errors and alarms
- Night safe functionality

Security Plus: Automated (SSA)

For enhanced authentication and operational protection. All SafeControl Manager solutions are built on a foundation of robust, proven security. Security Plus adds advanced authentication and monitoring features for environments with elevated security or regulatory requirements. Applicable for automated safe deposit locker systems.

Ideal when

You require stronger identity verification, enhanced audit trails or proactive monitoring of system usage.

Included features

- Biometric authentication
- Video recording
- Two-factor authentication via one-time password (OTP)
- Detect Mode for identifying suspicious usage patterns
- Operating time control and overview

Institute Plus: Automated (SSA)

For centralised operation across multiple systems. Institute Plus enables SafeControl Manager systems to work together across sites. It focuses on centralisation, supporting a consistent operation in multi-system or multi-branch environments. Applicable for automated safe deposit locker systems.

Ideal when

You operate across multiple locations or branches and require unified control, consistency and coordinated system operation.

Included features

- Centralisation of systems
- Replication server
- Replication client

Security Plus: Electronic (SDL)

For enhanced authentication in electronic locker environments. Extension Security Plus: Electronic is designed specifically for electronic locker systems that require stronger access control and identity verification, without the need for full automation or advanced monitoring features.

Ideal when

You operate electronic locker systems and need improved authentication security, such as biometric verification or one-time passwords, to meet internal security policies or regulatory requirements.

Included features

- Biometric authentication
- Video recording
- Two-factor authentication via one-time password (OTP)

Extension Package Plus: Mechanical (MSDL)

For extended functionality in mechanical locker environments. Extension Package Plus Mechanical is designed specifically for mechanical locker systems that require additional customer interaction and secure on-site handling, without transitioning to electronic or automated locker environments.

Ideal when

You operate mechanical locker systems and want to extend the functionality with basic self-service, secure handling and capabilities while maintaining an effective workflow.

Included features

- Self-service via KDU
- Licence for Secure Safe Systems
- Signature pad support

Extension Package Plus: Electronic (SDL)

For expanded operational control and system coordination. Extension Package Plus is designed for organisations seeking basic system coordination and notifications across multiple environments, without introducing advanced security or customer-facing features. Applicable for electronic locker systems.

Ideal when

You need basic system coordination, notifications and replication across environments without advanced security or authentication requirements.

Included features

- Centralisation
- Fee accounting
- Push message status
- Extension of the notification system
- Replication server with one client
- Additional replication client

Data Centre/FI (SSA/SDL/MSDL)

For integration with institutional IT environments. This package enables seamless integration between SafeControl Manager and institutional or core banking systems, supporting efficient data exchange and secure system communication. Applicable for automated safe deposit locker systems and electronic locker systems.

Ideal when

SafeControl Manager must integrate with institutional IT infrastructures or core banking systems, such as OSPlus.

Included features

- Host Interface Server (HIS)
- Host Interface Client
- Host Interface Login
- Administration-only interface options

A flexible model that grows with you

By combining the suitable licence model with selected capability packages, safe storage operations and businesses can start with exactly what they need today and expand over time. This modular structure ensures clarity, scalability and long-term investment protection.

Need help choosing the right setup?

Our team can help you identify the most suitable licence model and capability packages based on your operational requirements, ensuring a solution that fits your organisation today and scales for tomorrow.
