

Gunnebo ModulPrim

Certified modular strong room, grade 0–X, combining high security, flexibility and efficient space utilisation.

ModulPrim is a certified modular strong room available in grades 0–X, designed for flexible installation and efficient use of space. It combines certified burglary protection with a modern construction approach suited to a wide range of building and operational requirements.

Industry proved

ModulPrim is certified according to EN 1143-1 burglary resistance standards. VdS certification covers grades 0–IX, while ECB-S certification is available for grades II–III in bolted construction and grades IX–X including protection against core drilling.

Customisation

ModulPrim is a modular strong room system designed to

adapt to specific building and operational requirements. The solution can be configured to meet project-specific layouts and dimensions while optimising usable space through thin wall construction, all while maintaining certified performance.

Flexibility

The modular design enables installation in both new builds and existing spaces, including locations where traditional vault construction is not feasible. Prefabricated elements are assembled on site using welded or bolted connections, creating a compact and robust structure. The system can also be dismantled and relocated if requirements change, offering long-term adaptability.

Product Specifications

Grade	Weight (kg/m ²) Welded	Wall thickness (mm) Welded	Weight (kg/m ²) Bolted	Wall Thickness (mm) Bolted
O	60	55	N/A	N/A
I	70	55	N/A	N/A
II	155/200	55/70	165	55
III	155/200	55/70	165	55
IV	200	70	N/A	N/A
V	196/200/295	55/70/100	N/A	N/A
VI	270/310	85/100	N/A	N/A
VII	330	100	N/A	N/A
VIII	480	135	N/A	N/A
IX	450/530	125/150	N/A	N/A
IX (CD)	480	125	N/A	N/A
X	530	150	N/A	N/A
X (CD)	560	150	N/A	N/A

Possible applications

ModulPrim is designed for professional environments requiring secure and adaptable strong room solutions, including:

- Retail
- Residential
- Defence
- Bank and CIT
- Other commercial facilities

Welded or bolted Installation

ModulPrim is available with welded or bolted installation to match different operational priorities. The welded option provides a highly rigid, permanent structure, making it ideal for long-term installations with maximum stability. The bolted option delivers comparable strength using certified fasteners, while enabling easier disassembly for relocation or reconfiguration. Both methods provide fast on-site assembly, maintain consistent quality through prefabricated elements and support integration with modern security systems for a complete, adaptable solution.

Lock options

A series of high-security locking solutions is available including key lock, mechanical combination lock and electronic lock for enhanced security.
